Capstone Project

Employee Attendance

Week 1- MongoDB

use employee_tracker;

--create collections

db.createCollection("task_feedback");

--sample record

```
db.task_feedback.insertMany([
...     {
...         employee_id: 1,
...         date: new Date("2025-03-12"),
...         feedback_type: "peer_review",
...         notes: "Excellent collaboration on the recent project. Demonstrated strong problem-solving skills and team work."},
...     {
...         employee_id: 2,
...         date: new Date("2025-03-13"),
...         feedback_type: "manager_review",
...         notes: "Needs improvement in time management. Late submission."}]);
```

--creating indexes for faster querying

db.task_feedback.createIndex({ employee_id: 1 });

db.task_feedback.createIndex({ department: 1 });
